

## WELCOME

**A**ngela Exports has been in the Service of the society since the past 45 years trading and Exporting its products Since the time man has been tapping and extracting the benefits of the Coconuts Palm and all its bi products for the greater benefits of Mankind and its Society. This relationship between man and Coconut palm products grew into a great tradition which got embedded into the ethnic heritage of the local region giving birth to an industry rich in Colours, Design, Tradition, Durability, Eco friendly, Ornamental and Economical with an eye to a Global clientele.

With the back drop of such a rich experience behind us Angela Coir Mills was Established on the Family tradition from generation to generations serving and satisfying Customers locally, Internationally and all Global market with utmost commitment to uncompromising quality and 100% Customer satisfaction.

We export Fresh 100% matured Coconuts and its bi-Products like Desiccated coconut powder, Virgin coconut oil, Copra, Coconut cake, Coir pith, Curled Coir rope, Coconut fiber, Coconut shell charcoal and Spices. Also we have been in the forefront of Designs, Manufacture and Export of all Coir (Natural Coconuts Fiber) based products for that purpose we have built 6000 Sq feet industry with man power whose skills and expertise have made us the leaders in this industry in a very short span of time.

## 100 % MATURED COCONUTS

**W**e offer a wide range of Coconuts that are in size and have Coconut water in it. We take utmost care of our Coconut farms by ensuring the growth and development of the Coconuts fruits is followed scientifically using natural ingredients like, animal and organic fertilizers, bio-pest control methods are followed to obtain a product of high quality as good as mother nature can give you.

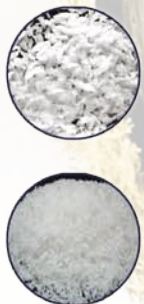

The Coconuts fruits are harvested by hand manually without damage or dropping and they are selectively graded for Size, Quality and Weight. The fruits which undergo a hygienic dehusking process is packed for Export in food grade Polypropylene bags, batched and labeled as per customer's request. We are presently having consistent and steady Export to UAE, Qatar, Oman, Saudi Arabia and UK. Our Coconuts range can be availed at competitive prices.

## WE MANUFACTURE DESICCATED COCONUT POWDER

**O**ur high quality Desiccated Coconut powder is naturally sweet, has a nutty flavour and a crisp texture. This product is bacteria free and white in color. The process of Coconuts powder manufacture is fully machined and done under strict quality supervision within a sterile environment untouched by human hand until the packed stage.

Size aligns with required weight of 7 Kgs, 10Kgs and 25 Kgs. Packaging is available with a safe self life of One year in normal storage condition. It is mostly used in Hotel industry, Food industry, Catering and Asian Cuisine, Bakery product, Confectionery and Chocolate industry. Our Desiccated Coconut powder range can be availed at competitive prices.

DESICCATED COCONUT  
POWDER

DE-HYDRATED  
KERNEL (COPRA)

## DE-HYDRATED KERNEL (COPRA) IS THE DRIED MEAT OR KERNEL OF THE COCONUT.

### Making copra:

Removing the shell, breaking up, drying usually is done where the palms grow, by the natural process of pure sunlight in day light hours. No chemicals, preservatives or artificial drying machineries are used. Coconut oil is extracted traditionally by grating or grinding copra. Nowadays, the process of coconut oil extraction is done by crushing copra to produce coconut oil, and the by-product is known as cake.

## VCO IS POPULARLY DEFINED AS THE NATURALLY PROCESSED

VCO is the chemical and additive free oil from fresh coconut meat or its derivatives (coconut milk and coconut milk residue). It has that fresh coconut aroma and flavour ranging from mild to mildly intense, depending on the production process used. Water white in colour, it is the "purest and healthiest" form of coconut oil.

## THE SHELL CHARCOAL IS MANUFACTURED BY BURNING SHELLS OF FULLY MATURED COCONUTS

Coconut Shell Charcoal is the raw material required for the manufacture of activated carbon. That is in limited supply of air sufficient only for carbonization, but not for complete destruction. We offer these at most reasonable prices.

## 100 % MATURE COCONUT COIR FIBER IS EXTRACTED FROM THE FIBROUS OUTER COVER OF THE COCONUT

They are white or light brown in colour. Our Natural Coir Fiber is spun to make yarn to make mats or rope. Coconut Coir Fiber, we produce is water-proof and resistant to salt water. We are one of the leading Coconut Coir Fiber Exporter in India. Coir Fiber is baled with the assistance of plastic straps, to ensure its high quality and utility.

Coir Fiber is of two types—brown and white. Coir obtained from fresh green Coconut is termed as White Fiber, which is finer than the Brown Fiber. The Brown Fiber is the outcome of Seasoned fully Matured Coconuts which lose their green color in the process. Each of them has their own distinct types of applications. The Brown Fiber is widely used for fabrication of doormats, brushes, coir mattresses and other upholstery material where as the White Fiber is used for making ropes, making fishing nets, and other eco-friendly Products.

## THE CURLED COIR THAT WE MANUFACTURE FROM COCONUT FIBER

That is highly regraded for its strength and durability. In this age of nylon ropes the fact curled coir is still holding fort is due to its ruggedness and versatile. Our range of curled coir is highly regarded by our clients. We fabricate the curled coir out of aged brown coir fiber, which is made from modern technology. Curled Coir has versatile application. The coir that we manufacture serves as the base of coir mattresses, coir cushions, carpet underlay, seat cushions and rubberized coir pads. Our expertise in the field has made us one of the most reputed coconut coir rope fabricator. As suppliers and exporters we are highly regarded for our product range.

### Specifications :-

- \* Diameter :- 18 - 31 mm \* Curls/ feet :- 14 - 24 mm \* Weight/ feet :- 60-100 mm  
Moisture - 15% maximum
- \* Long fiber( more than 150 mm) :- 20 % minimum \* Medium fiber( 100 - 150 mm) :- 15- 45 %
- \* Short fibre ( 50 - 100 mm ) :- 20- 30 % \* Bit fibre ( upto 50 mm) :- 15 % minimum
- \* Unpurity :- 10% maximum

CURLED COIR ROPE

## COCONUT PEAT IS ALSO KNOWN AS COIR PITH BLOCK

Coconut Peat is also known as Coir Pith Block, coir pith or coir dust which is available in blocks is made from coconut husks, which are the by-products of coconuts. It is used for horticultural and agricultural applications and also used as much, soil treatment and a hydroponic growth medium.

They are shipped in the form of compressed bales, blocks or slabs. A single kilogram of coco peat will expand to 15 litres of moist coco peat by addition of water. We are the exporter of Coconut Coir pith block in India. We export both LOW EC and HIGH EC blocks.

### Specifications :-

- \* Weight : 5 Kg blocks   \* Size : 30 x 30 x 10 cm   \* pH : 5.5 - 6.8
- \* Moisture : 10 - 15 %
- \* Compression Ratio : 6:1   \* Expansion Volume : 75 – 80 litres (After Adding Water)

## COIR LOGS ARE ALSO KNOWN AS GEO ROLLS OR VEGETATION FASCINES

These are strong and flexible construction modules of a compact roll of coir web covered by an exterior coir mesh netting which aids in the stabilization and revegetation of sites where steepness or high exposure to waves or currents causes instability.

Their configuration and density help them to maintain form without losing material. They also promote plant growth and microbial activity. In flowing water areas they facilitate new channel alignment. In standing water they initiate sedimentation, facilitate vegetation and dissipate induced wave energy.

Geo rolls collect and hold mineral and organic particles, provide a physically stable substratum for root growth and gradually bio-degrade to leave a self-sustaining erosion control system. The interior of the geo roll consists of 100 % coir fibre webs cross lapped or air layed, followed by needle punching or stitch bonding.

## 100% ECO-FRIENDLY

It is generally used to prevent soil erosion from land surface and promote quick vegetation. Woven and non woven geotext are 100% eco-friendly and ideal for soil bio-engineering applications. It is available in different weight and can be produced in various width up to 4mtr.

## THE USE OF PVC MOLDED BRUSH MAT MAKES IT ANTI-SKID AND DURABLE.

The use of PVC molded brush mat makes it anti-skid and durable. The mat is manufactured by top quality Vycome Coir Yarn and non skid PVC base by special molding process. It is available in attractive designs and printed in Natural and Bleach surface of the mats. The range is offered in different patterns and different shapes of Rectangular and Half round. It is easy to clean and highly durable

Standard sizes:- \* 40 x 60 Cms  
\* 45 x 75 Cms

## THE USE OF RUBBER MOLDED BRUSH MAT MAKES IT ANTI-SKID AND DURABLE.

The use of rubber molded brush mat makes it anti-skid and durable. These mats are made by molding Coir creel mats with natural rubber. Rubber molding will be arranged from natural ideal rubber. The appearance will be bright with the presence of molding with various designs. The range is offered in different patterns and different shapes of Rectangular and Half round. It is also easy to clean and durable.

Standard sizes:- \* 40 x 60 Cms  
\* 45 x 75 Cms

## RUBBER MOLDED RIBBED MATS

### THIS ITEM IS TRADITIONALLY MANUFACTURED FROM TOP QUALITY ARATORY COIR YARN

**T**his item is molded by traditionally manufactured ribbed matting from top quality Aratory Coir Yarn with natural rubber which is used as Non Brush mat. It is durable and lasting. Rubber molding will be arranged from natural ideal rubber. The appearance will be bright with the presence of molding with various designs. The range is offered in different patterns and different shapes of Rectangular and Half round.

Standard sizes:- \* 40 x 60 Cms  
\* 45 x 75 Cms

## RUBBER MOLDED PANAMA MATS

### THE USE OF RUBBER MOLDED PANAMA MAT MAKES IT ANTI-SKID AND DURABLE.

**T**his item is molded by traditionally manufactured panama matting from Vycome Coir Yarn with natural rubber which is used as Non Brush mat. It is durable and lasting. Rubber molding will be arranged from natural ideal rubber. The appearance will be bright with the presence of molding with various designs. These mats are available in different patterns and different shapes of rectangular and half round.

Standard sizes:- \* 40 x 60 Cms  
\* 45 x 75 Cms

## GREEN CARDAMOM

Cardamom is known worldwide as the Prince of the Spices world. It is one of the most highly regarded naturally flavoring and taste enhancing ingredient used in Indian, Eastern oriental, Arab and European cuisines. Cardamom is widely used in Baked goods, Meat, Poultry, Deserts and pastries. Green Cardamom seeds has a complex flavor described as Sweet, Floral spicy with citric elements. Angela Exports Green Cardamom grown in completely organic surroundings free from chemicals. We ensure the green Cardamom supplied by us complies with the highest quality standard meticulously monitored from the plant in the soil to the export package. Delivered to you the prince of spices in its natural wonderful flavor and aroma. We are able to supply various quantities in air sealed packaging at the most competitive price

GREEN CARDAMOM

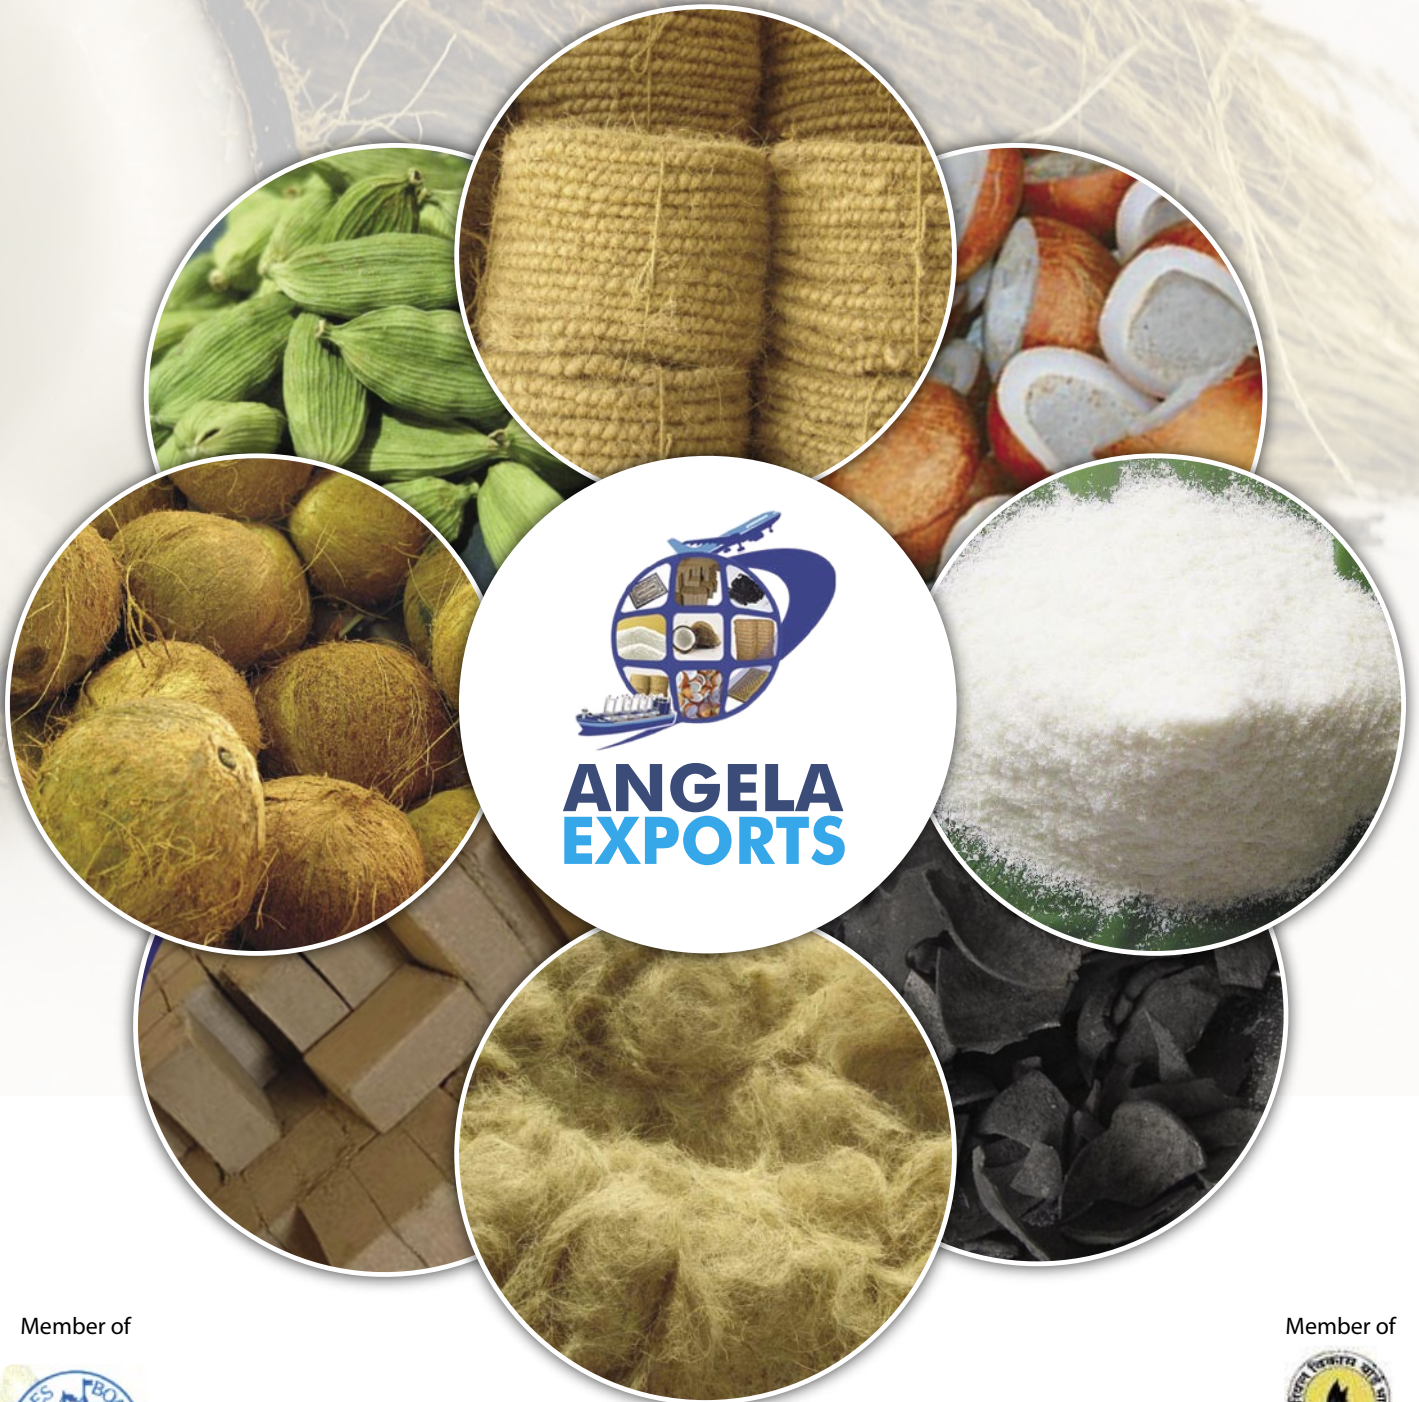

*We are happy to mention that our organization has acquired the goodwill and confidence of our Customers by consistently maintaining high product quality and competitive pricing.*
